Vishal Rai

Software Engineer | Java, Spring Boot, Microservices, AWS, Kubernetes

Kolkata, India | +91 8240485685 | rai.vishal0801@gmail.com | linkedin.com/in/vishal-rai-b0316422a | github.com/vishalrai123

PROFESSIONAL SUMMARY

Software engineer with 3+ years of experience building the platform under FinTech applications - a Spring Boot microservice framework, the AWS and Kubernetes infrastructure it runs on, and the CI/CD pipelines that ship it. Focused on automation with measured results, including 40-60% faster AWS environment creation, 60% less framework-upgrade effort and over 65% less job-migration effort.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, Bash, Groovy

Backend: Spring Boot, Spring Security, Spring Cloud (Config, Gateway, Consul), Spring Batch, Spring Data JPA, OAuth2 / OIDC, JWT, Resilience4j, Apache Camel, JMS

Data: PostgreSQL, Redis, Elasticsearch, Liquibase

Cloud & DevOps: AWS (CloudFormation, EKS, ECR, S3, EC2, RDS, EFS), Kubernetes, Helm, Docker, Jenkins, GitLab CI, Nexus, HashiCorp Vault

Observability: Grafana, Prometheus, Loki, Tempo, Alloy, ELK Stack (Elasticsearch, Logstash, Kibana), OpenTelemetry

Frontend: React, Angular, Module Federation, Redux Toolkit, SlickGrid

Testing & Tools: JUnit, Mockito, EvoSuite, Randoop, Diffblue Cover, Git, Jira, Confluence, JasperReports, FineReport

AI & Automation: MCP servers, Claude Code, AI agent skills, XyOps, JS7, job2do

PROFESSIONAL EXPERIENCE

Associate Software Developer, NRIFT India Pvt Ltd Aug 2023 - Present

Kolkata, India | Grade 1 Level 2 since Apr 2025; Grade 1 Level 1, Aug 2023 - Mar 2025.

- Built core modules of a Spring Boot microservice framework used by business teams, including menu- and action-level authorization with Spring Security and JWT, inherent multi-tenancy, a Spring Batch framework and an SMTP notification service.
- Built an API gateway with Redis-backed rate limiting, Consul discovery and Resilience4j circuit breaking, with profile-based configuration and HashiCorp Vault for secrets.
- Deployed the platform on Amazon EKS from cluster creation onward with Helm, NGINX ingress, cert-manager, HA replicas and namespace segregation; a resource report across about 30 pods supported right-sizing.
- Codified a multi-client AWS estate in CloudFormation and built a Python template generator on botocore, cutting new environment creation by over 40% and lookalike environment creation by 60%.
- Built Jenkins (Groovy) and GitLab Runner CI/CD pipelines and centralized Docker deployments from Nexus, S3, ECR and GitLab registries with full release traceability.
- Took Liquibase from proof of concept to production across a monolith and microservices, with gated migrations and two-tier (feature and release) rollback.
- Upgraded the framework to Spring Boot 4 with AI agent skills, cutting upgrade effort by 60%, and migrated financial job charts from job2do and JS7 to XyOps, cutting migration and testing effort by over 65%.
- Built two MCP servers adopted across the organization and Python release tooling for scoping, change reconciliation and fix-version promotion.
- Integrated switchable Grafana and ELK observability stacks and distributed report execution that processes bulk reports 30% faster.

Associate Software Engineer Intern, NRIFT India Pvt Ltd Oct 2022 - May 2023

Kolkata, India

EDUCATION

Bachelor of Technology in Computer Science Engineering, Techno Main Salt Lake 2019 - 2023

LANGUAGES

English (Professional), Hindi (Professional), Bengali (Fluent)
