Vishal Rai

Software Engineer | Java, Spring Boot, Microservices, AWS, Kubernetes

Kolkata, India | +91 8240485685 | rai.vishal0801@gmail.com | linkedin.com/in/vishal-rai-b0316422a | github.com/vishalrai123

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building cloud-native, distributed applications for FinTech. Builds Spring Boot microservices, secure REST APIs and React micro-frontends, and runs them on AWS and Kubernetes (EKS) with Helm, CI/CD and infrastructure as code. Known for automation with measurable results, including 60-70% faster environment provisioning, 60% less framework-upgrade effort and over 65% less migration and testing effort.

TECHNICAL SKILLS

Languages: Java, Python, SQL, Bash, TypeScript

Backend: Spring Boot, Spring Cloud (Config, Gateway, Consul), Spring Security, Spring Data JPA, Spring Batch, REST APIs, OAuth2, JWT, Resilience4j

Databases & Messaging: PostgreSQL, Oracle, MySQL, Redis, Liquibase, JMS

Cloud & DevOps: AWS (EKS, ECR, S3, RDS, Aurora, EFS, CloudFormation), Docker, Kubernetes, Helm, Jenkins, GitLab CI, Nexus, HashiCorp Vault

Frontend: React, Micro-Frontends (Webpack Module Federation), Redux Toolkit

Observability: Grafana, Prometheus, Loki, Tempo, ELK Stack (Elasticsearch, Logstash, Kibana), OpenTelemetry

Testing & Tools: JUnit, Mockito, Git, Jira, Confluence, JasperReports, FineReport, XyOps, MCP, AI coding agents

PROFESSIONAL EXPERIENCE

Associate Software Engineer II, NRIFT India Pvt Ltd Aug 2023 - Present

Kolkata, India

- Designed and built a Rapid Application Development (RAD) framework for Java Spring Boot microservices on PostgreSQL and Redis, with built-in multi-tenancy, a Spring Batch framework and an email notification service reused by business teams.
- Implemented secure REST APIs with tenant-, menu- and action-level RBAC using Spring Security, OAuth2 and JWT, behind an API gateway with Redis-backed rate limiting and Consul service discovery.
- Architected production-grade deployments on Amazon EKS with Helm, NGINX ingress, cert-manager TLS, domain-based routing and HA replicas; a resource report across about 30 pods drove right-sizing and cost savings.
- Automated AWS environment provisioning with CloudFormation and a Python environment manager, cutting environment setup effort by 60-70%.
- Built Jenkins and GitLab Runner CI/CD pipelines for backend services and micro-frontends, deploying to DEV (Docker), SIT (Minikube) and PROD (Amazon EKS) with versioned artifacts in Nexus, ECR and GitLab registries.
- Led the frontend migration from Angular to React micro-frontends (Webpack Module Federation) and integrated switchable Grafana and ELK observability stacks.
- Upgraded a microservice platform to Spring Boot 4 using AI agent skills, cutting upgrade effort by 60%, and migrated its workflow engine from Camunda to Operaton.
- Migrated financial job charts from job2do and JS7 to XyOps with agent-driven runs and a job-by-job equivalence workbook, cutting migration and testing effort by over 65%.
- Introduced Liquibase database change management across a monolith and microservices, with pipeline-gated migrations and feature- and release-level rollback.

KEY ACHIEVEMENTS

- Shining Star Employee (Best of the Quarter) for DevOps automation that cut environment provisioning time by 60-70% using AWS CloudFormation.
- Deployed and managed a production-grade application on Amazon EKS.
- Built two MCP servers adopted across the organization for day-to-day engineering work.

EDUCATION

Bachelor of Technology in Computer Science Engineering, Techno Main Salt Lake 2019 - 2023

CERTIFICATIONS

NPTEL Certified Java Programmer

LANGUAGES

English (Professional), Hindi (Professional), Bengali (Fluent)
